

Health Insurance

Quick Guide to Medigap Plans

Medicare is a government-funded and run health insurance program. To be eligible for Medicare, you must: be 65+ years old; have collected SSDI more than 24 months; or have been diagnosed with end-stage renal disease (ESRD) or ALS. Medicare coverage is broken down into 4 parts:

- **Part A: Hospital Insurance.** Includes hospital care, skilled nursing facilities, nursing homes, hospice, & home health.
- **Part B: Medical Insurance.** Includes outpatient services, preventive care, labs, mental health care, ambulances, & durable medical equipment.
- **Part D: Prescription Drug Coverage.** You have different plans to choose from depending on where you live, with different premiums and formularies.

- **Part C: Advantage Plans.** Part C is an alternative to Parts A & B and includes the benefits and services covered under Parts A & B, and usually Part D. You can select a PPO or HMO plan that is run by a Medicare-approved private insurance company. If you buy a Part C plan, you are not eligible to buy a Medigap plan.

How do I qualify for Medigap?

Medigap plans are additional insurance you can purchase to help pay deductibles, co-payments, co-insurance amounts, and other expenses original Medicare does not cover. You can buy a Medigap policy from any licensed insurance company in your state. You will pay an additional monthly premium for a Medigap plan, in addition to premiums for other Medicare parts. Medigap plans are standardized, meaning every insurer offers plans lettered A-N (see the chart on the next page).

Note: Individuals who become eligible for Medicare after 1/1/2020, will no longer be able to purchase Medigap Plans F or C. Any individuals who already have Plans F or C will be able to keep those plans.

To qualify for a Medigap plan, you must be enrolled in Medicare Part A and B. Part A and B together are referred to as “Original Medicare.” For a more in-depth breakdown of Medicare Parts A and B, see our Quick Guide to Medicare – Extended (TriageHealth.org/quick-guides/medicareextended).

When Should I Buy a Medigap Plan?

You can buy a Medigap plan during your Medicare initial enrollment period (IEP), which automatically begins three months before the month you turn 65 and lasts 7 months. If you sign up for a Medigap plan during the IEP, you cannot be denied coverage. But if you wait to buy a plan outside of the IEP, you may face a pre-existing condition exclusion period of up to 6 months and/or the plan may cost more. Once you have a Medigap plan, it is automatically eligible for renewal, regardless of any health problems. Your Medigap plan can only be canceled if you fail to pay the premiums.

Quick Guide to Medigap Plans

If you are under 65, and have Medicare because of a disability, your state may not require insurance companies to sell you a Medigap plan. Visit [TriageHealth.org/StateLaws](https://www.triagehealth.org/statelaws) for more information.

	Plan A	Plan B	Plan C	Plan D	Plan F	Plan G	Plan K	Plan L	Plan M	Plan N
Medicare Part A Co-insurance & Hospital Costs (Up to an additional 365 days after Medicare benefits are used)	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%
Medicare Part B Co-insurance or Co-payments	100%	100%	100%	100%	100%	100%	50%	75%	100%	100%
Blood First 3 Pints	100%	100%	100%	100%	100%	100%	50%	75%	100%	100%
Part A Hospice Co-insurance or Co-payments	100%	100%	100%	100%	100%	100%	50%	75%	100%	100%
Skilled Nursing Facility Co-insurance			100%	100%	100%	100%	50%	75%	100%	100%
Medicare Part A Deductible		100%	100%	100%	100%	100%	50%	75%	50%	100%
Medicare Part B Deductible			100%		100%					
Medicare Part B Excess Charges					100%	100%				
Foreign Travel Emergency (up to plan limits)			80%	80%	80%	80%			80%	80%
Out of Pocket Maximum							\$7,220 in 2025	\$3,610 in 2025		

The percentage shown is the amount the Medigap plan covers.

Example

Part B of Medicare has a 20% co-insurance amount. Most chemotherapies are covered under Medicare Part B, which can create high out-of-pocket costs. Buying a Medigap plan that covers Part B's 20% co-insurance can greatly reduce your out-of-pocket costs. These examples show how:

- Jimmy: Jimmy is nearly 65, lives in Chicago, and is about to begin 1 year of IV chemotherapy treatments, which will cost \$10,000 a month. What would be his out-of-pocket costs?
 - Option 1: Original Medicare
 - Part B monthly premium = \$185 per month x 12 = \$2,200.00
 - Part B deductible = \$257
 - Part B co-insurance (just for his chemo) = \$10,000 x 20% = \$2,000 x 12 months = \$24,000
 - **Total for Part B and chemo cost-share = \$26,477**
 - Option 2: Original Medicare + Medigap Plan G, which costs \$300/month based on his age and where he lives
 - Part B monthly premium = \$185 per month x 12 = \$2,200
 - Part B deductible = \$257
 - Part B co-insurance (just for his chemo) = \$0 (paid for by Medigap plan)
 - Medigap Plan G monthly premium = \$300 x 12 months = \$3,600
 - **Total for Part B and Medigap Plan G = \$6,077**
- Jimmy: Even if Jimmy did not sign up during his IEP and faces a 6-month pre-existing condition exclusion period for anything related to his cancer, a Medigap plan could still save him money:
 - Original Medicare + Medigap Plan G, with a 6-month exclusion period
 - Part B monthly premium = \$185 per month x 12 = \$2,200
 - Part B deductible = \$257
 - Part B co-insurance (just for first 6 months of chemo) = \$10,000 x 20% = \$2,000 x 6 months = \$12,000
 - Part B co-insurance (just for second 6 months of chemo) = \$0 (paid for by Medigap plan)
 - Medigap Plan G monthly premium = \$300 x 12 months = \$3,600
 - **Total for Part B and Medigap Plan G = \$18,077**

Differences by State

If you live in [Massachusetts](#), [Minnesota](#), or [Wisconsin](#), Medigap policies are standardized in a different way. For more information visit www.medicare.gov/health-drug-plans/medigap/basics.
